

主要统计指标解释

居民消费价格指数 是反映一定时期内城乡居民所购买的生活消费品价格和服务项目价格变动趋势和程度的相对数。

工业生产者价格指数 是反映工业产品价格变化趋势和变动幅度的统计指标,是工业企业的产品价格在不同时间和空间条件下平均变动的相对数。工业生产者价格包括工业生产者出厂价格和工业生产者购进价格。工业生产者价格指数是进行国民经济核算和经济管理的重要依据。

Explanatory Notes on Main Statistics Indicators

Consumer Price Indices are relative figures reflecting the trend and degree of changes in price of consumer goods and services purchased of urban and rural households during a given period and the results of the comprehensive summary calculation of the consumer price index of urban households and the consumer price index of rural households. Using the consumer price index, the degree of influence of retail prices and service price changes of consumer goods on the actual living expenses of urban and rural households can be observed and analyzed.

Producer Price Indices for Industrial Products reflect the trend and magnitude of changes in the prices of industrial products. They are the relative numbers of average changes in the price of products of industrial enterprises under different conditions of time and space. Producer price for industrial products contains producer price for industrial products and purchasing price for industrial producers. Producer price indices for industrial products is an important basis for national accounts and economic management.
